

Chad Koslovsky

Senior Full-Stack Developer · Product Engineer · Applied AI

Loveland, Colorado · chad@koslovsky.xyz

TARGET

Senior Full-Stack Developer, Long-Term Role at Independent Upwork Client · Worldwide · U.S.-client-facing

PROFESSIONAL PROFILE

Product engineer and founder with 15+ years taking difficult software and systems from incomplete requirements through production and support. At Technomancy IT, I have often been the only engineer or technical lead, owning discovery, architecture, React/Next.js frontends, TypeScript/Node.js services, APIs, PostgreSQL data, authentication, integrations, infrastructure, deployment, debugging, and the operational work after launch. I have helped teams ship fundraising systems used in raises totaling millions of dollars and have built or secured applications where money, purchasing, ownership, and transaction paths required careful handling.

CAPABILITIES

React · Next.js · TypeScript · Node.js · PostgreSQL · REST APIs · GraphQL · tRPC · authentication · integrations · background jobs · AWS

RELEVANT EXPERIENCE

Founder / Product Engineer / Systems Lead — Technomancy IT LLC | 2015–Present

- Grew a freelance engineering practice into a small technical shop; earned Upwork's Top Rated badge and ranked among the top 10% of freelancers.
- Own product discovery, architecture, implementation, infrastructure, deployment, debugging, and support across web applications and SaaS.

Full-Stack Product and Security Engineer — Bitlectro Labs | 2021–2023

- Owned full-stack implementation across web applications, integrations, and product releases.
- Reviewed and hardened application, identity, transaction, and integration paths for systems designed to handle meaningful value.

Senior Systems Engineer / Datacenter Architect — Front Range Internet | 2015–2019

- Led infrastructure readiness, recovery verification, monitoring, incident response, and escalations.
- Served as primary technical contact for SOC 1 and SOC 2 audits under SSAE 18 and owned backup and disaster-recovery verification.

Systems / Software Engineer — Office Evolution | 2013–2014

- Built centralized applications connecting CRM, provisioning, onboarding, and service operations across locations.
- Translated cross-department handoffs into explicit workflows across client environments.

Network Engineer — PlumChoice / Everon | 2011–2013

- Operated and troubleshooted networks and endpoints for SMB clients.
- Built diagnostic and support tooling around recurring operational needs and communicated directly with business owners and end users.

Infrastructure and Systems Focal — IBM | 2009–2011

- Operated shared enterprise infrastructure consumed across application teams and customer environments.
- Coordinated access, change, incident, escalation, backup, and compliance work across technical and business stakeholders.

PRODUCT & ENGINEERING WORK

AI-enabled support and operations platform — Technomancy IT LLC | Current

- Built a client-facing platform spanning CRM, scheduling, meetings, billing, analytics, infrastructure telemetry, and AI-assisted workflows.

Open-source signing and document workflow — Open-source project | Current

- Built a Next.js and React workflow with Node-side APIs, PostgreSQL, encrypted storage, audit history, webhooks, identity paths, and a Rust verification component.

Private research workspace — Velatis client collaboration | Current

- Connected deterministic tools, privacy-aware identity, sharing, administration, payments, and context-aware AI around private user data.
